

**Achievement and
Progress.**

**A Pebble Brook School
Practical Guide.**

September 2022

Achievement and progress at Pebble Brook School fits in to our vision and ethos and curriculum policy. We believe in having a clear understanding of the key reasons behind what we provide for our pupils.

Namely:-

- Maximise achievement in literacy, numeracy and personal development (as we call it 'Great Learners Great People – Careers and Employability, receptive language, expressive language, RE, social and emotional development and citizenship)'
- Maximise achievement in science, PE, ICT, and technology.
- Offer elements of art, music, modern foreign language, humanities and outdoor education.
- Maximise achievement in our vocational subjects – woodwork, hospitality, horticulture, small animal care, plumbing, bricklaying etc
- Enable social interaction and resilience through our SIRS framework.

Our vision is for our pupils to be independent when completing school, fully prepared for their next steps into adulthood through being functionally literate and numerate, ready for employment, adept at life skills for independent living and to be citizens holding strong British values.

We recognise that each pupil will achieve at different rates, and be strong in some areas and developing in others and have varying final outcomes

For this reason, we track progress as described below. Tracking progress helps to drive new learning forward, challenge weaknesses and celebrate achievement.

This document is written in conjunction with the following policies:-

Curriculum

Teaching, Learning and Assessment

Marking

Behaviour and discipline

Sixth form guide.

Education & Health Care Plans

EHCP's play an important role in SEND pupils education and strive to bring together pupil's education, health and care needs under one document updated yearly via an annual review.

Pupil's strengths and areas for development fall under 5 areas;

1. Communication and Interaction
2. Cognition and Learning
3. Social and Emotional and Mental Health
4. Sensory and Physical (including medical)
5. Independence and Community Involvement

At Pebble Brook School we update all our pupil's EHCP annually. At the Annual Review we prepare in advance by analyzing their progress towards the targets set the previous year. This will be completed by SLT, teachers and therapists and finalized by the students themselves. This is done alongside all other subject assessments. The two working together will promote personal success.

A 'one to one' interview is completed for every pupil, usually with the Careers Officer and the outcome is shared at the meeting.

The first, and most important part of completing the formal review is the opinion of the student. All Annual Review meetings focus on the pupil and creates an enabling environment that encourages conversation as well as questioning and decision making.

Parents and/or carers are asked to complete a document of their views in advance of the meeting. This is discussed at the Annual Review alongside any further comments or questions.

The setting of the new targets for the following year comes mainly with these key contributions of the pupil first and then their family. Contributions also come from all teachers, OT, Behaviour Support and SALT. Meetings are always chaired by SLT so their contribution is also noted.

Pebble Brook have employed an EHCP Co-ordinator who attends the meeting and draws all the information together. She updates the EHCP according to the wishes of the student, family and professionals and submits it to the local authority.

Hopes and Aspirations

An extremely important part of the EHCP is in Section A where we record the short and long term hopes and aspirations of our pupils. This is mainly for Years nine and above but can come earlier.

Alongside the hopes and aspirations we record provision that the school commits to fulfilling. This provision will relate directly to the pupil's wishes and will not be part of normal developmental provision.

Eg 'My ambition is to work directly with animals on a farm'.

- **Provision:** Source possible part time courses at Berks College of Agriculture.
- Work experience with Road Farm.

(Careers Officer)

NB We add this section as an additional target on our Earwig platform.

Subject Progress and Achievement

Progress is recorded on our online assessment tool Earwig. Earwig is a commercial scheme that carries an assessment framework as well as key information on each pupil and an evidence feature.

All curriculum areas have their own assessment framework on Earwig and teachers input assessment data half termly.

English and maths make up 50% of our pupils' timetable which indicates the importance we put on these two core subjects.

English and maths teachers input data every 2 weeks and we ask that evidence in the form of photos or reference to exercise books is added every half term.

KS3

Our assessment frameworks for English and maths are based on the A2E toolkit, which we have used for many years. We have looked at the number of statements in the frameworks and decided that a 30 point increase over an academic year is expected progress. This equates to movement of one band and a half of the assessment tool, which we believe is good progress given our pupils' starting points.

By completing one band and a half, our pupils will be on track to maximise expected achievement by the end of each key stage.

We also assess reading ages, spelling ages and use the PUMA maths tests at appropriate levels termly to provide summative assessment data. Outstanding progress in Reading and spelling is an improvement of 6 months or more in a year.

For PUMA tests we deem outstanding progress as a 50% improvement in scores over a year.

KS4

In KS4 we continue to assess pupils English on the A2E toolkit as well as reading and spelling ages. We also assess against the functional skills assessment framework for English. English teachers base the starting points on this framework on their end points at KS3. This determines which level exams pupils will be entered for.

In maths pupils are assessed against either the AQA entry level awards, Level 1 and 2 awards and if appropriate the GCSE framework.

Progress is also kept against the assessment bands as described above.

KS5 is a continuation of KS4 with regard to English and maths.

If progress is not acceptable or showing significant weakness, we analyse the varied reasons. When outside factors such as behaviour or ill health are eliminated, we can then provide intervention.

The subjects described above as 'elements of' are there to provide fascination, love of learning and cross curricular English and maths. When these lessons are delivered, the key learning objectives are taken from our GLGP framework.

KS5

English continues to be assessed against the functional skills framework and maths moves to functional maths apart from those pupils following a GCSE curriculum in maths.

Our High needs KS5 group are assessed against the pathways to independence framework again on Earwig, alongside A2E toolkit.

The curriculum areas listed here are taught in Lessons one, two and three in KS5 and follow the same timings and approach as the rest of the school.

The students at KS5 then have a personalised timetable that can include work experience, National Citizenship, Duke of Edinburgh, community involvement, life skills and citizenship. These learning experiences are captured within GLGP and EHCP targets.

Great Learner Great People

GLGP is an assessment framework that measures progress in the key areas of Social Development, Emotional Development, Receptive language, Expressive Language, Careers and Employment, RE and Citizenship. All pupils are assessed against this framework, from year 7 to year 14, we target intervention in a variety of areas from this data. Interventions will include behaviour support, OT, SALT, SIRS, as well as factors impacting from outside of school.

Records are kept in one place and personalised to the pupil.

Direct attention to knowledge and skills from this framework are targeted in the KS3 'elements of' lessons mentioned above as well as in KS4 vocational subjects, PSHE and E curriculum and KS5 personalised framework for individual students.

Bedgrove, Berryfields and Brill – Nurture groups

Bedgrove, Berryfields and Brill are mixed age groups of pupils who have high needs and a highly specialised curriculum. Pupils in these groups are assessed against the A2E toolkit in Earwig and are subject to exactly the same principles of progress and achievement detailed within this guide.

Reporting

Whole school progress and achievement is collated, analysed and presented to governors in the December Governing Board meeting and published on the website. Reporting on progress takes place at twice yearly parents evenings, Annual Reviews and other statutory meetings such as Social Care core groups. Information is also available on request.

Progress records are updated half-termly.

Accreditation

Our external exam pathways are carefully chosen so that our pupils get the chance to complete coursework and assessments that are appropriate to them. Pathways can vary significantly across year groups which illustrates the commitment we have to make sure that all pupil's can succeed at their level, or beyond if possible.

GCSE's can be offered in English, Maths and Art. Pupils who are assessed as capable of achieving GCSE are identified early and given significant additional personal input.

Core Curriculum

KS4 English Edexcel Entry Levels 1-3 and Level 1 and 2

KS4 Maths AQA Entry Levels, Edexcel Level 1 and 2 awards, AQA GCSE

Science AQA Unit Award Scheme

ICT WJEC Entry levels, Level 1 and 2

KS5 English Edexcel Entry Levels 1-3 and Level 1 and 2

KS5 Maths NCFE Functional skills Entry levels and Level 1 and 2

KS5 IT OCR Functional skills IT Entry Levels and Level 1 and 2

GCSEs
